Election/Restrictions

1. Claims 1-4, 9-19, 22-25, 28 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on March 28, 2007. (Note: applicant has argued that the election requirement failed to apply the PCT unity of invention standard, but failed to specifically point out what was lacking in the election requirement and/or was included therein that caused it to not be in compliance with that standard.)

Drawings

2. The replacement drawings filed October 22, 2007 are approved.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5-7, 20, 27, 30 & 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hubbard, US 2,088,703 in view of Cather, US 4,272,641. In Fig. 6, Hubbard shows a dust cover seal comprising: an attachment portion 24c for attaching the dust cover to a dash panel; and a plurality of integrally formed (see page 2, lines 12-14) bellows/lip portions 26c fixedly attached to the attachment portion. Hubbard does not expressly disclose a cylindrical contact

member attached to the inner diameter of the plurality of bellows. In col. 1, lines 29-40 and col. 2, lines 22-26, Cather teaches providing a seal with a cylindrical polytetrafluoroethylene contact member 46 in order to provide a seal that will maintain a seal under adverse conditions. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the dust cover seal of Hubbard by including a cylindrical polytetrafluoroethylene contact member attached to the inner diameter of the plurality of bellows in order to provide a seal that will maintain a seal under adverse conditions as taught by Cather.

5. Claim 26 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hubbard in view of Cather as applied to claim 5 above, and further in view of Reed, US 4,553,760. The combination of Hubbard and Cather includes all the limitations of the claims except axial grooves on the inner circumference of the cylindrical contact member. In col. 3, lines 7-12, Reed teaches providing axial grooves 74 on the inner circumference 70 of a cylindrical contact member 56 in order to facilitate lubrication. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the combination of Hubbard and Cather by including axial grooves on the inner circumference of the cylindrical contact member in order to facilitate lubrication as taught by Reed.

Response to Arguments

6. Applicant's arguments with respect to the rejected claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
